An ecosystem is a geographic area where plants, animals, and other organisms, as well as weather and landscape, work together to form a bubble of life. Ecosystems contain biotic or living, parts, as well as abiotic factors, or nonliving parts. Biotic factors include plants, animals, and other organisms. Abiotic factors include rocks, temperature, and humidity.

A zoo is a place where animals live in captivity and are put on display for people to view. The word "zoo" is short for "zoological park." Zoos contain wide varieties of animals that are native to all parts of the Earth. Though people have kept wild animals for thousands of years, those collections have not always resembled modern zoos. The first zoos were created as private ...
