Netezza User Guide

You can use the SQL commands to create and manage your Netezza databases, user access and permissions for the databases, and to query the contents of the databases. These topics assist you in understanding how to manage and maintain databases by using Netezza SQL, and how to construct queries for the data. The topics describe the commands, their syntax, and how to use them, and provides examples of most commands and their output.

The IBM Netezza data warehouse appliance — a powerful parallel computing platform — is fully exploited by IBM Netezza Analytics to deliver high-speed, scalable analytics processing. The appliance uses the high-speed throughput of the Asymmetric Massively Parallel Processing (AMPP) architecture to maximize speed and efficiency for in-database analytics processing.

IBM Netezza Tutorials - Tekslate

The Netezza database concepts map the Oracle Data Integrator concepts as follows: A Netezza cluster corresponds to a data server in Oracle Data Integrator. Within this server, a database/owner pair maps to an Oracle Data Integrator physical schema. Oracle Data Integrator uses Java Database Connectivity (JDBC) to connect to a Netezza database.
