The old SDK featured drawing with the pointer in notes, but the 903 does not. The scribble program is entirely unorganized. Bookmarks can't be named. About the only thing the pocketbook has going for it here is use of well known formats (html and bmp). review has written an addon to link screenshots and scribble together. Fixed in 2.0.5. The SDK options to edit text and graphics for notes are now present, although the eink optimizations making Scribble responsive are not present.

Problems with my PocketBook 903 | Yann Vernier's Blog
The first book I read was the included user manual. It immediately greeted me with an inconsistency, as the title clearly states "PocketBook Pro 903" with a picture of a model

602 or 603 device. This starts a bit of a trend, as PocketBook reuse their documentation just as eagerly as their software.

This was even with the latest official pocketbook pro 902 firmware, v2.0.6 (as of this writing). A few resets and screen refreshes seemed to temporarily cure the problem, but it keeps recurring. The one way to get rid of the patchy illegible and very light/faint diseased text/menu display is to use an app like CoolReader 3, and set the page to ...
